

# Pride Ignite

## Completed Trainings

- Resume Building session
- Medication Administration
- Food Safety Training

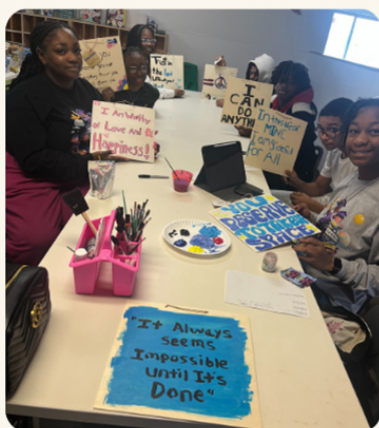

## Resume Building

This session was designed to help teenagers create professional and polished resumes to prepare for job opportunities, internships, and college applications. Participants will learn the basics of resume writing, including how to format their resumes, highlight skills and achievements, and tailor their content to specific job roles

## Medication Administration

This class is designed to teach young students how to safely manage and administer medications, either for themselves or others. This session covered understanding medications, proper dosage and timing, safety and storage, emergency situations, and legal and ethical responsibilities.

## Food & Safety Training

This training is designed to teach young individuals the essential practices for handling, preparing, and storing food safely to prevent contamination and foodborne illnesses. Key topics include: Personal hygiene, safe food handling, temperature control, allergen awareness, and emergency procedures.
